**BUDGET CONFERENCE COMMITTEE REPORT EXPECTED TODAY**

After much hard work and many long hours, the members appointed to serve on the conference committee have constructed the final agreement of items to be included in the next two-year state operating budget. We anticipate the committee will present their work later today in a special committee hearing.

League staff will be going through the language today and tonight, once it becomes available, to determine what impacts will be felt by Ohio cities and villages. Once we are able to identify what the final changes are, we will send a special bulletin to our members alerting them of what changes and new policies to expect.

We want to thank all of our municipal officials who have spent time and energy to educate legislators on consequences to changes being proposed and for the efforts to correct misguided information that may influence state leader's decisions. The activation of our cities and villages has been remarkable in the budget process and your efforts have not gone unnoticed at the Ohio Statehouse.

Please look for communication from the League tomorrow with more budget information.
